1.Factors influencing customer churn:

- Demographic, Services & Pricing are the primary factors influencing customer churn
- eg. Churn is least when the monthly charge is ~\$ 50
- Churn is higher when the no:of dependents are less

2.Demographic factors influencing customer churn:

- Churn is least at the age ~ 25, 40, 62
- Churn is highest at the age ~ 32, 55, 70
- Marital status doesnot affect the customer churn
- Female churn a little more than that of male

3.Services that influence customer churn:

- When the internet service is Fibre Optics, churn is more
- Monthly contract type customers churn more than that of yearly contract type
- Customers having multiple lines churn less than that of others

Recommendations:

- Steps has to be taken to convert the customers from monthly contract to yearly contract
- Services related to Fibre Optics has to be improved
- Churn is more when the call duration is less than 100 minutes. So, steps to be taken to retain those customers.
- Monthly charge of \$50 appears to be the best pricing
